

Pakistan Telecom Authority Headquarters, Islamabad

PTA Cyber Security Advisory No. 289

19-07-2024

**Name:** Multiple WordPress Plugins Vulnerabilities

**Threat Classification:** Vulnerability

**Affected Software / Services:**

- Slider in Rbs Image Gallery plugin for WordPress 3.2.19
- Themify Ultra theme for WordPress 7.3.5
- SiteGuard WP Plugin for WordPress 1.7.6
- Photo Gallery
- Images

**Summary:**

Multiple vulnerabilities have been identified across various WordPress components. The “Rbs” Image Gallery plugin's Photo Gallery, Images, and Slider functionalities are vulnerable to cross-site request forgery due to insufficient input validation, potentially allowing an attacker to execute unauthorized actions via manipulated HTTP requests. The “Themify” Ultra theme for WordPress contains an authorization bypass vulnerability, enabling a remote authenticated attacker to circumvent security restrictions by sending specially crafted requests. Additionally, the “SiteGuard” WP Plugin suffers from a sensitive information disclosure flaw, where inserting sensitive data into transmitted content could allow a remote attacker to retrieve confidential information by exploiting specially crafted requests. These vulnerabilities collectively highlight significant security risks for WordPress sites.

Severity	High
Attack Vector	Cross-Site Request Forgery (CSRF)

**CVE's:**

CVE-2024-5343	CVE-2023-46146	CVE-2024-37881
---------------	----------------	----------------

**Recommendations:**

- It is highly advised to upgrade to the latest version of Plugin for WordPress, available from the WordPress Plugin Directory.
  - For RBS: <https://wordpress.org/plugins/robo-gallery/>
  - For Themify: <https://themify.me/themes/ultra>
  - For SiteGuard: <https://tw.wordpress.org/plugins/siteguard/>
- Keep all the systems and software's up to date with the latest security patches to prevent attackers from exploiting known vulnerabilities.
- In case of any incident, please report to this office, through PTA CERT Portal and email.
