Recommendations:

- Updates are available on the section 'Updated Packages' at following official link to fix the aforementioned vulnerabilities: https://access.redhat.com/errata/RHSA-2020:3574
- Please visit following official link for the details to apply the RHEL system update: https://access.redhat.com/articles/11258
- In all cases, ensure the availability of stable version, before upgrade, by the relevant vendor.
- In all cases, also ensure that devices to be upgraded to new release meet the requirements set by the vendor.
- Whenever required, access the system with minimal access rights and privileges.
- Use licensed antivirus and regularly obtain its latest updates with its real-time scanning capabilities enabled.
- Only use licensed software and avoid download/use of cracked and pirated software.
- Designate a PoC from your security / Network team (if yet not designated), for seeking assistance and reporting security issues.
- In case of any incident, please report to this office.
